Summer 2016 edition

Quick Tips!

Hear Ye, Hear Ye:

Announcing our **new 36-month Limited Warranty** for all **Hawker® Armasafe™ Plus and MIL PC batteries!** Find it at: www.hawkeraplus.com

That's **double the warranty** from previous years...now **compare that to the competition!**

Answer to question from last issue:

What are those six gray discs on the top of my Hawker® Armasafe™ Plus battery?

Those six gray discs are actually **vent caps** that cover **one-way valves (a.k.a., valve-regulated)**. If the battery gets too hot...say, from overcharging...gases are created. If the pressure from the gas becomes too great, then **the valves and the vent caps allow some of the gas to escape**, thereby preventing rupture of the battery's casing.

Furthermore, underneath each vent cap is a **flash arrestor!** If there are **any sparks in the battery compartment**, the flash arrestor ensures that they **do not enter the battery**...which could contain explosive hydrogen (or hydrogen-sulfide) gas!

Flash arrestor

Did you know:

that the **U.S. Army is transitioning** from flooded wet-cell batteries to **valve-regulated lead acid (VRLA)** and **absorbed glass mat (AGM)** batteries (like the **Hawker® Armasafe™ Plus and MIL PC** brands)?

Department of the Army, Office of the Deputy Chief of Staff, G-4 (DALO-MNF) Memorandum dated 29 Mar 2016

Training:

US Army Ordnance School (91B AIT); Camp Pendleton; Fort Campbell; CT, DC, IA, IL, KS, NH, & WV ARNGs...what do they have in common? They got battery maintenance smart this year...for free! Wanna get smart too? Ask us for **FREE Battery Maintenance and Recovery Training (BMRT)**

Next Issue:
What if a gray vent cap is elevated on my Hawker® Armasafe™ Plus battery?
