# 

## Quick Tips!

### Hear Ye, Hear Ye:

Announcing our **new 36-month Limited Warranty** for all *Hawker® Armasafe™ Plus and MIL PC batteries*! Find it at: www.hawkeraplus.com

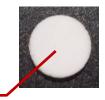

That's **double the warranty** from previous years...now **compare that to the competition!** 

#### What are those six gray discs on the top of my Hawker® Armasafe™ Plus battery?

Furthermore, underneath each vent cap is a <u>flash arrestor!</u> If there are <u>any sparks in the battery compartment</u>, the flash arrestor ensures that they <u>do not enter the battery</u>...which could contain explosive hydrogen (or hydrogen-sulfide) gas!

Those six gray discs are actually **vent caps** that cover **one-way valves (a.k.a., valve-regulated)**. If the battery gets too hot...say, from overcharging...gases are created. If the pressure from the gas becomes too great, then **the valves and the vent caps allow some of the gas to escape**, thereby preventing rupture of the battery's casing.

Flash arrestor

## Did you know:

that the **U.S. Army is transitioning** from flooded wet-cell batteries to **valve-regulated lead acid (VRLA)** and **absorbed glass mat (AGM)** batteries (like the <u>Hawker<sup>®</sup> Armasafe™ Plus and MIL PC</u> brands)?
